5 Prior years' adjustment (Errors occurred in recognizing inventories)

Inadvertently errors occurred in between the years 2006 to 2015 due to recognizing the inventories at lower prices than the actual invoice prices of those inventories. The fact is that advances were given to the suppliers against purchase of inventories according to the agreements with the suppliers. The rest of the payments against the purchase of inventories were made on arrival of the goods as per the agreements and the costs of inventories were recognized at lower prices than the full invoice value of the goods which resulted in the overstatement of advances. These advances have been carried forward since long but in substance it should have been adjusted with inventory. However, part of such advances was adjusted in the previous year. Subsequently in September 2017, it was revealed that there was another part of such advances of Tk. 166,268,294 which needed adjustment in the financial statements of 2016-2017 as per the requirements of *BAS 10: "Events after the Reporting Period"*. Non-adjustment of such event falls under error and accordingly, retained earnings on 1 July 2016 have been restated following the guidance of *BAS 8*. Thus, no such doubtful "Advance to Suppliers" exist in the financial statements of 2017-2018.

Credit risk is the risk of a financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Company's receivables. Management has a credit policy in place and exposure to credit risk is monitored on an ongoing basis. Risk exposures from financial assets are as under:

ii) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity (cash and cash equivalents) is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. Typically, the Company ensures that it has sufficient cash and cash equivalents to meet expected operational expenses, including financial obligations through preparation of the cash flow forecast, prepared based on time line of payment of the financial obligation and accordingly arrange for sufficient liquidity/fund to make the expected payment within due date.

41.1

There is contingent liability on account of unresolved disputed corporate income tax assessments involving tax claims by the tax authority amounting to Tk. 41,40,203 for the assessment year 2015-2016 for which appeals are pending with the Taxes Appellate Tribunal Division Bench-1, Dhaka. However, the Company's management feels that the claim by the Tax authority is unjustified and has no merit.
